

You want business value from your software investments. By obtaining on-call support services and customizations from PeopleSense, you put yourself in the driver's seat of your software investment.

PeopleSense provides timely support and substantial savings on total support costs, freeing-up budgets to drive those ERP functional enhancements that support your business and add value for your customer.

PeopleSense support, developers, and consultants are knowledgeable of your industry and terminology. Our staff has extensive first-hand experience in metals and cable/wire.

We understand the special challenges and needs your company is likely to have as a wire and cable manufacturer or as a metals producer. That knowledge, experience, and understanding enables us to focus on your company goals and unique needs.

Building on our experience with other companies in your industry, we can share what we have seen as non-proprietary 'best practices' and/or help evaluate and implement innovative new approaches that your company may have in mind.

Like most third-party ERP software support providers, we provide a full range of support, training, software customizations and enhancements, and consulting services designed to help you realize your goals.

Axis Metals®, and Aptean Metal ERP® are trademarks of Aptean, Inc., and are products created, developed, published and supplied by Aptean, Inc. PeopleSense is not owned, controlled, sponsored, acknowledged or in any way associated with Aptean, Inc.
