Your continuous
improvement and
success is
our objective.

Experienced Business Process Evaluation Consultants

PeopleSense has assembled a group of skilled technical and Business Process Evaluation (BPE) Consultants with extensive background and experience working with manufacturing companies using M2M® Manufacturing Software as their primary ERP system.

PeopleSense consultants have over 300+ years of combined M2M® Manufacturing Software experience.

Our consultants understand the value of listening to your needs and goals and have the skills to help you attain those goals.

Our M2M® Manufacturing Software Business Process Evaluation Consultants have a broad understanding of M2M® and experience with hundreds of M2M® users and their methods. This knowledge gives them a unique perspective with which to evaluate your business processes - a perspective that can sometimes only come from a fresh set of trained eyes.

Our Passion is Driving Your Success

M2M® Manufacturing Software Business Process Evaluation Procedure

A M2M® Manufacturing Software Business Process Evaluation will help you recognize and achieve improved business processes.

The PeopleSense ERP M2M® Manufacturing Software Business Process Evaluation procedure varies depending on your needs but generally includes the following three steps:

1. Pre-Visit Conference Call

Our consultant will conduct a high level interview with your key personnel. This interview will help our consultant:

- a. Determine areas of concern
- b. Clarify specific goals
- c. Schedule the on-site visit
- d. Prepare your staff for what they should expect during the on-site visit

2. Site Visit

Two (2) or three (3) days on-site at your manufacturing plant and general offices. During this visit our consultant will tour your plant and offices and interview key users in order to:

- a. Understand your business goals
- b. Uncover causes of specific concerns or issues
- c. Assess how you are currently utilizing M2M® Manufacturing Software and why these methods were implemented
- d. Assure that your procedures are a proper fit for the M2M® Manufacturing Software system
- e. Review and discuss the findings with management

3. Business Process Evaluation Report

Within two (2) weeks of the site visit our consultant will write a Business Process Evaluation report outlining the findings and recommendations and suggesting a course of action to achieve your goals. This report can be used as a roadmap for implementing improvements and enhancements to your M2M® Manufacturing Software business processes.

Business Process Improvement (BPI) Consulting

PeopleSense consultants routinely provide expert implementation and training for the following:

- Reporting (VFP and SSRS)
- Advanced Reporting
- Shop Floor Manager
- Bar Code (Legacy Bar Code and Shop Floor Data Collection)
- Planning & Scheduling (Basic and Advanced)
- Advanced Configurator
- ZetaDocs Set-Up

Affordable Prices

Our goal is to help you get the most from your software investment.

Contact us and we will provide you with a Professional Services Agreement, which outlines the way we do business and payment options.

You will find that our rates are competitive and considerably lower than working directly with M2M® Manufacturing Software.
