Vertance Navigator for M2M®

PeopleSense INC.
ERP solutions and services
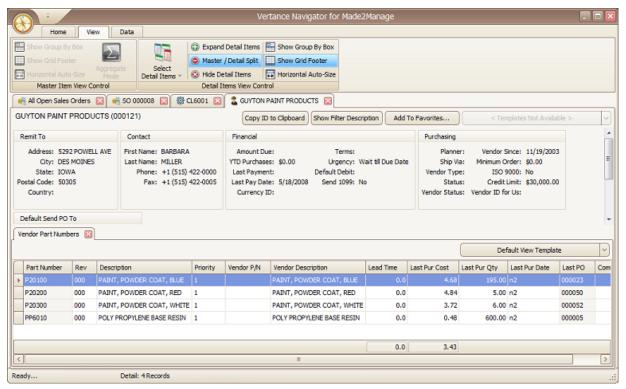

Vertance Navigator is a revolutionary companion product for M2M®. It provides quick Drill-Down and powerful Data Analysis capabilities to help your company get the most from your M2M® ERP system.

Navigator provides a rich set of tools that will enable you to find exactly the data you are looking for in your M2M® database.

Powerful, but simple-to-use Queries — Quickly create complex queries. Each M2M® document has its own query interface which let's you easily define query parameters associated with that document.

Excel-like Grid display of multiple documents — No more viewing documents one at a time with VCR buttons, or dealing with static paper reports. Navigator displays query results in a powerful Grid which let's you dynamically explore the data you have requested.

One Click Drill-Downs — Navigator links all of your M2M documents together using simple, one click links. Follow the "Circle of Life" from Customer to Sales Order to Job Order to Shipper to AR Invoice. Or go from Job Order BOM to Item Master Material Availability to Purchase Order. All with one click for each link and unprecedented speed.

Sort, Filter, Group, and Find functions — Navigator includes a number of data analysis features which will help you analyze and locate exactly the information you are looking for.

Simple Export of Grid data to Excel — Quickly print your data or share it inside and outside of our company by exporting to Excel. The "what you see is what you export" allows you to quickly format the data sent to Excel. Hide or show Grid columns to get the data organized as you want it. Filter your data to show just the information you want to share.
