

M-Files®

Have you ever recreated a document that already existed because you weren't able to locate the original on the network? Do you often have to search through two or more systems to find the information you need to do your job? Is it generally time-consuming and challenging to find the info you're looking for?

M-Files is a metadata-driven document management platform that enables you to **instantly find the right information** in any context, **automate business processes**, and **enforce information control**. This provides your organization with a **competitive advantage** and **substantial ROI** as you deliver **superior customer experiences** and **higher-quality work** with **lower risk**.

M-Files works with **Acumatica Cloud ERP**, **Intuitive Manufacturing Software®**, **M2M®**, and many other ERP solutions.

Realize ROI Quickly

When you're searching for critical information, every second counts. With our metadata-driven document platform, you'll find the right information as soon as you need it. You'll also realize a 270% ROI and 40% boost in productivity.

Find and Use Documents Easily

When you can instantly access the information you need, every time you need it, then there's nothing that can hold you down. Give your business powerful potential with a metadata-driven document management platform built to boost productivity.

Complete Work Effectively

Automated document management workflows drive better business outcomes. Find the results you're looking for with a metadata-driven platform designed to eliminate errors and boost productivity.

Ensure Compliance Automatically

Stay compliant with regulations and avoid costly penalties with M-Files' metadata-driven document management platform. Reduce risk by ensuring compliance, information security, accuracy, and auditability.

Collaborate Securely

Together, we can go farther, faster. You'll be amazed at the speed of business when you bring customers and employees together in collaborative workspaces. Share information instantly and securely with the only metadata-driven document platform.
